EDUCATION

- Vellore Institute of Technology, Bhopal** Bhopal, India
B.Tech in Computer Science and Engineering (CGPA: 8.82) Sep 2023 – May 2027

SKILLS

- Programming: C++, Python, TypeScript, JavaScript, Shell Scripting
- Web & Frameworks: HTML, CSS, React.js, Next.js, Node.js, Express.js, Tailwind CSS
- Cloud & DevOps: AWS, Docker, Kubernetes, Jenkins, Terraform, Ansible, GitLab CI/CD
- Databases: MongoDB, MySQL, PostgreSQL
- Tools: Git, GitHub, Linux, VS Code, RESTful APIs, AWS CLI

PROJECTS

- Virtual Pandit** Production Deployed
 - AI-Powered Spiritual Guidance Platform (Next.js, TypeScript, MongoDB, LangChain, Groq)*
 - Engineered a full-stack AI platform integrating Vedic knowledge with LLM-based inference
 - Implemented Retrieval Augmented Generation (RAG) using LangChain for context-aware responses
 - Developed vector-based scripture search enabling semantic retrieval from Vedas, Upanishads, and Puranas
 - Integrated external APIs (Prokerala, RapidAPI) for real-time astrology, Panchang, and scripture data
 - Built scalable backend using Next.js API routes with serverless architecture deployed on AWS
 - Optimized performance using SSR and ISR, reducing latency and improving SEO and Time-to-Interactive
- WinkWear** Production Deployed
 - AI-Enabled MERN E-commerce Platform (React, Node.js, MongoDB, Gemini, AWS)*
 - Engineered a full-stack e-commerce platform with JWT-based authentication and role-based access control
 - Developed RESTful APIs for product catalog, user management, and cart synchronization
 - Integrated AI shopping assistant using Google Gemini for real-time product recommendations
 - Implemented context-aware querying to dynamically fetch product data based on user intent
 - Designed persistent cart system using React Context API for seamless state management
 - Deployed application on cloud infrastructure with scalable architecture and secure session handling
- Mavelo**
 - Full-Stack Car Rental Platform (React, Node.js, Express, Nodemailer)*
 - Developed a full-stack car rental platform with dynamic car listing, filtering, and search functionality
 - Designed responsive UI using Tailwind CSS and Framer Motion for smooth user experience
 - Implemented booking workflow with form handling and real-time validation
 - Integrated backend email service using Nodemailer to send booking details to admin and confirmation to users
 - Structured REST APIs for booking, contact, and subscription features
 - Optimized frontend performance achieving approximately 35% faster load times
- BlogVerse** Cloud-Native Deployment
 - Three-Tier MERN Architecture (Docker, Kubernetes, AWS EKS)*
 - Architected a three-tier application separating frontend, backend, and database layers
 - Containerized client and server applications using Docker and pushed images to AWS ECR
 - Provisioned AWS infrastructure including IAM, EC2, and EKS cluster using eksctl
 - Deployed application on Kubernetes with namespaces, deployments, and services
 - Configured AWS Load Balancer Controller and Ingress for external traffic routing
 - Executed end-to-end deployment pipeline from local build to cloud-hosted scalable system

ACHIEVEMENTS & CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (SAA-C03) – 2026
- AWS Certified Cloud Practitioner (CLF-C02) – 2026
- Microsoft Certified: Azure Fundamentals (AZ-900) – 2025
- Recognized among the Best Submissions at TinyFish \$2M Pre-Accelerator Hackathon – 2026
- Finalist, Solvit Hackathon 2025
- Top 100 / 7000+ teams, Canara CyberSuraksha Hackathon 2025
- LeetCode**: Solved 400+ Data Structures & Algorithms problems
