SUMMARY

Cloud-Native Software Engineer specializing in DevOps, Full-Stack Development, and AI-powered applications. Experienced in building scalable distributed systems using AWS, Kubernetes, Docker, FastAPI, React, and Next.js, with hands-on expertise in CI/CD, cloud infrastructure, and multi-agent AI workflows using OpenAI APIs and LangGraph.

EDUCATION

Vellore Institute of Technology, Bhopal

Sep 2023 – May 2027

B.Tech in Computer Science and Engineering

CGPA: 8.89/10

WORK EXPERIENCE

TM Cloud Solutions LLC (USA)

Jun 2026 – Present

AI Application Developer Intern

Remote

- Engineered Resume2Hire, an AI-powered SaaS platform that generates ATS-optimized resumes by orchestrating 2–3 LLM calls through a multi-agent LangGraph pipeline, significantly reducing redundant API usage while improving generation efficiency.
- Built an end-to-end AI orchestration pipeline integrating OpenAI GPT-4o, LangGraph, ATS evaluation, gap analysis, resume optimization, and automated Latex rendering into PDF, DOCX, and TEX formats.
- Implemented browser automation using Playwright to automate multi-step job application workflows, reducing manual effort and improving the reliability of repetitive recruitment processes.

PROJECTS

Virtual Pandit

Production Deployed

AI-Powered Spiritual Guidance Platform (Next.js, TypeScript, MongoDB, LangChain, Groq)

- Implemented RAG pipelines using LangChain and vector embeddings, improving contextual response relevance by over 40%.
- Built semantic search across 1000+ scripture passages using vector embeddings and LangChain-powered retrieval.
- Integrated external APIs for astrology, Panchang generation, and scripture services to provide real-time personalized experiences.

WinkWear

Production Deployed

AI-Enabled MERN E-commerce Platform (React, Node.js, MongoDB, Gemini, AWS)

- Deployed and maintained a production-grade e-commerce platform on AWS, continuously serving users for over 7 months.
- Achieved search engine indexing with 250+ organic impressions and maintained a top-5 average search ranking position.
- Integrated Gemini AI to generate personalized product recommendations with average response times below 2 seconds.

Mavelo

Production Deployed

Cloud-Native Vehicle Rental Platform (React, Node.js, AWS, Docker, Kubernetes)

- Containerized frontend and backend services using Docker and orchestrated deployments on Kubernetes for scalable and fault-tolerant operations.
- Implemented CI/CD pipelines using GitHub Actions, reducing release cycles from hours to 2-3 minutes.

- Configured Prometheus and Grafana dashboards for real-time monitoring, alerting, resource tracking, and application observability.

BlogVerse

Production Deployed

Cloud-Native Publishing SaaS Platform (AWS EKS, Docker, Kubernetes, AWS ECS)

- Containerized and deployed 10+ microservices on Amazon EKS using Kubernetes, enabling scalable and highly available workloads.
- Automated build, security scanning, and deployment workflows using GitHub Actions, reducing manual deployment effort by 80%.
- Integrated Prometheus, Grafana to monitor 20+ infrastructure metrics and centralized application logs.

SKILLS

Programming: C++, Python, JavaScript, TypeScript, SQL, Shell Scripting

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: FastAPI, Node.js, Express.js, REST APIs

Cloud: AWS, Microsoft Azure

DevOps: Docker, Kubernetes, Terraform, Jenkins, Ansible

Databases: PostgreSQL, MongoDB, MySQL

Tools: Git, GitHub, Linux, VS Code

ACHIEVEMENTS & CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (SAA-C03)
- AWS Certified Developer – Associate (DVA-C02)
- AWS Certified Cloud Practitioner (CLF-C02)
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Best Submission – TinyFish \$2M Pre-Accelerator Hackathon 2026
- Finalist – Solvit Hackathon 2025
- Top 100 / 7000+ Teams – Canara CyberSuraksha Hackathon
- Solved 500+ LeetCode problems.
