Vellore Institute of Technology, Bhopal
B.Tech in Computer Science and Engineering (CGPA: 8.95)

Bhopal, India
 Sep 2023 – May 2027

- Programming: Python, TypeScript, JavaScript, C++, Shell Scripting
- Cybersecurity: OWASP Top 10, Vulnerability Assessment, API Security, Secure Coding, Threat Modeling, Ethical Hacking Fundamentals
- Networking Systems: TCP/IP, HTTP/HTTPS, DNS, Linux, Administration, Authentication, Authorization
- Cloud Security & AWS: IAM, AWS WAF, AWS Shield, Security Groups, NACLs, VPC, EC2, S3, EKS, ECR, CloudWatch, Load Balancing, Cloud-Native Security
- DevOps Automation: Docker, Kubernetes, Jenkins, GitLab CI/CD, Terraform, Ansible
- Security Tools: Nmap, Git, GitHub, Linux, AWS CLI, Nginx
- Databases: MongoDB, PostgreSQL, MySQL

- Virtual Pandit** Production Deployed
 - Cloud-Native AI Platform (Next.js, AWS, MongoDB, LangChain)*
 - Built and deployed a scalable cloud-native AI platform using Next.js serverless architecture
 - Designed backend APIs for secure request handling, authentication, data retrieval, and AI inference workflows
 - Implemented Retrieval Augmented Generation (RAG) pipelines with vector-based semantic search
 - Integrated third-party APIs while ensuring secure API communication and controlled data access
 - Explored secure LLM interaction workflows and prompt-handling mechanisms
 - Managed deployment workflows and backend services using AWS infrastructure
- BlogVerse** Cloud-Native Deployment
 - Three-Tier MERN Deployment on AWS EKS (Docker, Kubernetes)*
 - Architected and deployed a three-tier cloud-native application using Kubernetes on AWS EKS
 - Containerized frontend and backend services using Docker and managed images with AWS ECR
 - Provisioned scalable cloud infrastructure including IAM, EC2, VPC, and EKS using eksctl
 - Configured Kubernetes deployments, services, namespaces, ingress controllers, and networking components
 - Implemented secure traffic routing using AWS Load Balancer Controller
 - Applied IAM-based access controls and cloud security best practices
- WinkWear** Production Deployed
 - Scalable MERN E-commerce Platform (React, Node.js, MongoDB, AWS)*
 - Developed scalable backend services using Node.js and Express.js with modular API architecture
 - Implemented JWT authentication and role-based access control for secure user management
 - Designed RESTful APIs for product management, cart synchronization, and order workflows
 - Integrated AI-powered recommendation workflows with dynamic backend query handling
 - Deployed cloud-hosted services with secure session handling and optimized backend performance
 - Managed application state and persistent storage using MongoDB

- Studied Software Vulnerability Testing, Ethical Hacking, Secure Coding, Network Security, and Web Application Security concepts
- Performed network reconnaissance, host discovery, port scanning, and service enumeration using Nmap in controlled environments
- Practiced identification and analysis of OWASP Top 10 vulnerabilities including XSS, SQL Injection, CSRF, and Broken Authentication
- Applied API security testing concepts to evaluate authentication, authorization, and session management mechanisms
- Studied cloud security controls including AWS WAF, AWS Shield, Security Groups, NACLs, IAM policies, and DDoS mitigation strategies
- Applied security best practices for protecting web applications against common attack vectors and unauthorized access

ACHIEVEMENTS CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (SAA-C03) – 2026
- AWS Certified Cloud Practitioner (CLF-C02) – 2026
- ArcX Certified Foundation Level Cyber Threat Analyst
- Microsoft Certified: Azure Fundamentals (AZ-900) – 2025
- Top 100 / 7000+ Teams, Canara CyberSuraksha Hackathon 2025
- Recognized among the Best Submissions at TinyFish 2MPre – AcceleratorHackathon-2026
- Finalist, Solvit Hackathon 2025
- **LeetCode**: Solved 500+ Data Structures Algorithms Problems
